

To whom it may concern

I am writing this letter in support of Mr. Haytham Mohamed ElSayed who has worked with us onboard the Seven Eagle / IMO 9015905 as Vessel Medic/Emergency Medical Technician.

It has been a pleasure to work with him during this time. He has demonstrated both clinical competence and sound judgment in his patient care responsibilities. Mr. Haytham followed his patients throughout whatever ailment they may have had, paying particular attention to details.

He demonstrated a wide base of knowledge that he uses in diagnosing and treatment of his patients and was also efficient in handling emergency cases as they arose.

We work in a very tough environment that requires quick and precise decision which Medic Haytham Mohamed exhibited every time he was called upon.

Mr. Haytham is a well thought of and respected individual who gets along with his peers and the entire team although they are from different nationalities and cultures. He has a high regard for safety and while working for **Subsea 7** he has completed his entire required E-Learning training as well.

I highly recommend Mr. Haytham, it was a pleasure working with him and I believe he will be successful in whatever endeavors he may tackle in the future. I would highly recommend him for any medical position for which his has license.
